

PROGRAM-1

objective : HTML CODE TO DISPLAY YOUR EDUCATION DETAILS IN A TABULAR FORM.

```
DOCTYPE html>
html>
    <head>
        <title>Educational Details</title>
    </head>
    <body>
        <table border="1" cellspacing="4" cellpadding="4">
            <thead>
                <th>S.NO</th>
                <th>Course</th>
                <th>Board University</th>
                <th>School /college</th>
                <th>Year of passing</th>
                <th>Max. Marks</th>
                <th>Marks Obtained</th>
                <th>Percentage</th>
            </thead>
            <tbody>
                <tr>
                    <td>1</td>
                    <td>High School</td>
                    <td>CBSE</td>
                    <td>St. Don Bosco College</td>
                    <td>2023</td>
                    <td>600</td>
                    <td>400</td>
                    <td>66.66</td>
                </tr>
            </tbody>
        </table>
    </body>

```

PROGRAM - 3

Exercise : write on HTML code to illustrate the use of
the following :

- ordered list, unordered list and definition list.

```
<!DOCTYPE html>
<html>
  <head>
    <title> HSD Sport Club </title>
  </head>
  <body>
    <h1> Subjects of CSE </h1><h2>
      <ul>
        <li> web design </li>
        <li> Physics </li>
        <li> Rashtra Gramav </li>
        <li> Language </li>
        <li> Basic electronics </li>
        <li> Mathematics </li>
      </ul>
      <h3> web design topics </h3>
      <ul>
        <li> Introduction to HTML </li>
        <li> Educational Details </li>
        <li> order list </li>
        <li> unorder list </li>
      </ul>
      <h3> Description list </h3>
      <dl>
        <dt> <strong> HTML </strong> </dt>
        <dd> HTML describes the structure of a webpage. </dd>
      </dl>
    </body>
  </html>
```

dt> Body tag <dt>
dd> this contains the main visible content of the
web pages </dd>
dd>
/body>
/html>

Experiment 4

```
<body>
  <form>
    <fieldset>
      <legend> Register </legend>
      <label> Username:</label>
      <input type="text" placeholder="Enter your full name"
             required><br><br>
      <label> Email id:</label>
      <input type="email"> <br><br>
      <label> Gender:</label>
      <input type="radio" name="gender"> Male
      <input type="radio" name="gender"> female <br><br>
      <label> D.O.B </label>
      <input type="date"> <br><br>
      <label> Select country </label>
      <select>
        <option> America </option>
        <option> China </option>
        <option> India </option> <br><br>
      <label> Interesting topics </label>
      <input type="checkbox"> GK
      <input type="checkbox"> News <br><br>
      <label> Password:</label>
      <input type="password"><br><br>
      <button> Submit </button>
```

</fieldset>
</form>
</body>
</html>

Experiment NO: 5-

Objective : Write HTML code to demonstrate the use of Anchor Tag for the following separately -

- creating a web link that opens in a new window.
- Reference within the same html document.
- Making an image a hyperlink to display second image.

```
<!DOCTYPE
1. <!DOCTYPE html>
<html>
<body>
<h2>the target Attribute</h2>
<a href="https://www.w3schools.com/" target="_blank">
Visit W3Schools!</a>
<p>If target = "_blank", the link will open in a new browser
window or tab.</p>
</body>
</html>
```
